## Website

https://kevinyupolin.dev/

## Education

### University of British Columbia — Vancouver, British Columbia, Canada

Bachelor of Science in Chemistry

- Received the President's Entrance Scholarship.

## Experience

### Best Buy — Vancouver, British Columbia, Canada

*Best Buy is a large American multinational retailer providing technology related products and services*

#### Senior Software Engineer (Developer III)

- As tech lead of the Mobile Activation team, mentored multiple back-end engineers to transition into successful full-stack roles.
- Won Best Buy's hackathon by engineering one of the company's first AI-enhanced customer experiences, streamlining mobile phone purchases to improve in-store conversion and customer satisfaction.
- Led the development of Best Buy Canada's design system, delivering a scalable component library and established standards between design and developers.
- Spearheaded the Mobile Activation team's shift to AI-driven development, establishing new tooling standards and practices adopted across the team.
- Shipped a browser extension in a single day with AI-assisted development to automate JIRA link migrations during the move to JIRA Cloud, saving the organization hundreds of hours.
- Built an Android application for warehouse operations that directly contributed to the recovery and preservation of $18M in vendor funding.

Mar 2024 ····· Present

#### Software Engineer (Developer II)

- Led the development of the Enterprise Returns Application, delivering the chain-wide returns platform on schedule in four months with Nx, TypeScript, Next.js, NextAuth, and React to keep the rollout of Best Buy's new transaction system on track.
- Saved the Mobile Activation team more than 3 hours weekly by automating the build, release, and release approval processes.
- Reached the finals of Best Buy's hackathon with an LLM-powered check that flagged when an incorrect mobile device was scanned during the sale process.

Aug 2021 ····· Mar 2024

## Service Link — Vancouver, British Columbia, Canada

*Service Link is a workforce management software company servicing some of the largest utility companies in North America such as BC hydro, Con Edison, and Aqua America*

### Software Engineer

- Architected the new client UI with React, Microsoft Fluent UI, TypeScript, Redux, and Redux Saga.
- Attracted new customers by replacing the legacy mapping component with Esri Map.

Jul 2019 ····· Aug 2021

### Software Support Engineer

- Strengthened application security with Nginx, enabling the application to pass the HCL (IBM) AppScan.
- Improved release quality by replacing the centralized workflow with Gitflow.

Jul 2018 ····· Jul 2019

## Protrade Asia Limited - Subsidiary of Acer Inc. — Taipei, Taiwan

*Protrade is a full service trading and logistics company dealing in industrial raw materials*

### Special Assistant

- Automated price-update emails with VBA, cutting the time spent by 80%.

Oct 2016 ····· Jun 2017
